

Environmental Management Targets and Achievements

Status of the achievements for the main environmental targets

In order to realize Environmental Vision 2050, which is a guidepost for our medium-to-long-term environmental activities, we conduct annual evaluations of specific targets to promote our environmental activities.

○ : Target achieved △ : Partially achieved X; : Not achieved

Environmental Vision 2050	Indicator	FY2019 Performance	FY2020 Target	FY2020 Performance	Assessment	FY2021 Target
Achieve a Decarbonized Society	Reduce greenhouse gas emissions during production	457 (kilotons)	Less than 480 (kilotons)	437 (kilotons)	○	460 (kilotons)
	Reduce CO ₂ emissions through products	36,510 (kilotons-CO ₂ /Year)	More than 34,000 (kilotons-CO ₂ /Year)	41,780 (kilotons-CO ₂ /Year)	○	36,000 (kilotons-CO ₂ /Year)
Realization of a Recycling-Oriented Society	Ratio of waste sent to landfill	1.1%	Less than 2.0%	1.8%	○	Less than 1.5%
	Water intake per unit of net sales	1.5 (km ³ /¥100 million)	Less than 1.8 (km ³ /¥100 million)	1.5 (km ³ /¥100 million)	○	Less than 1.8 (km ³ /¥100 million)
Society that is in Harmony with Nature	Amount of Emissions of VOC Atmospheric Emissions	1,083 (tons)	Less than 1,694 (tons)	819 (tons)	○	Less than 1,694 (tons)

(Note)

1. Fuji Electric's environmental management activities in Japan cover domestic consolidated subsidiaries, and the activities overseas cover consolidated production subsidiaries. In other words, our activities in Japan cover consolidated subsidiaries (including offices), and activities overseas cover consolidated production subsidiaries (excluding offices).
2. Fuji Electric's environmental performance aggregation targets: sites that have obtained or are preparing to obtain ISO 14001 certification.
3. Environmental performance coverage rate: 99.6% of sites covered by our environmental management activities are aggregated. The aggregation range is equivalent to 95.3% of the entire Group (percentage figures refer to employee ratios).
