

Contribute to energy saving and cost reduction for air-conditioning and water treatment systems

Features

- Slim type with no control panel required and compatible with IP55 specifications* for dust-proofing and waterproofing
- Realizes energy saving through optimal control of fan and pump powers
- Reduces cost because it is all-in-one type with in-built peripheral functions

* Level of protection against infiltration by foreign solid objects and water. The higher the figure, the higher the level of protection.

Development going forward

Plan to begin sales of 0.75kW–37kW in FY2011

Plan to begin sales of 45kW–710kW in FY2012
