

Realize highest equipment efficiency in industry by adopting advanced 3-level format for Fuji Electric's original RB-IGBT power devices

Features

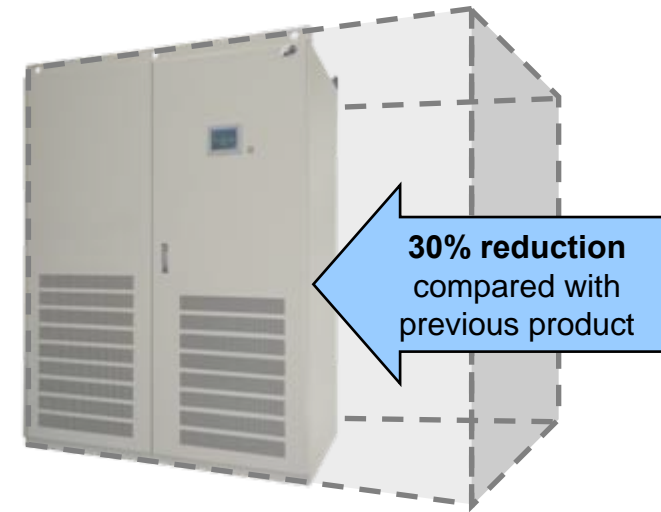

- Realizes equipment efficiency of 97%
- Compact and light
(30% reduction compared with previous product)
(W1,500 × D900 × H1,900)
- Compatible with high load power factor
(load power factor: 1.0)
Power output 500KVA (500kW)

Launch period

April 2011

Development going forward

- Create series of large-capacity UPSs
- Apply in UPS for overseas
- Create series of large-capacity PCSs

Electricity fee loss of high-efficiency UPSs
(load power factor: 0.9)
