

FUJI ELECTRIC REVIEW vol.65 no.2 2019 Detailed Contents

Preface	68
Contributing to the Creation of Sustainable Societies Through Energy and Environment Businesses Centered on Power Electronics Systems and Power Semiconductors	

Special Conversation	70
Toward the Creation of Sustainable Societies How to Apply the Fusion of Analog and Digital Technologies in Future Smart Energy Systems	

Achievements and Future Outlook	75
System Solutions That Combine Competitive Components with Control and IoT to Create Customer Value	

Highlights	81
-------------------	----

- Exhaust Gas Cleaning System for Marine Vessels (SO_x Removal Cyclone Scrubber)
- “HPnC” High-Capacity Power Module for Electric Railways
- High-Power, Direct Liquid Cooling Module for Automotive Applications
- RC-IGBT Module for High Power Industrial Applications
- “OnePackEdge System” that Realizes Non-Stop Equipment
- Smart Community Demonstration Project in Industrial Parks in Java, Indonesia
- EMS Model Factory in China
- “MICREX-SX SPH5000H” Highly Reliable Duplex System
- “XCS-3000 Type E” High-Speed Controllers for Electrical Machinery Control
- Start of Commercial Operation of Sakata Biomass Power Plant of Summit Sakata Power Corporation
- Transformer for Global Market
- 66-kV Substation in Harmony with the Environment for Canon Group
- “PIS-50/500” Power Conditioning System for Solar Power Generation
- High-Efficiency and High-Frequency Induction Furnace for Overseas Markets
- Coffee Machine for Seven-Eleven Japan Co., Ltd.
- Explainable AI for Diagnosis

Power Electronics Systems Energy	89
---	----

Energy Management	90
--------------------------	----

- 1 Simulator of Hydroelectric Power Station and Substation for Electric Power Development Co., Ltd.
- 2 Replacement of Distribution Automation System for the Okinawa Electric Power Company, Incorporated
- 3 Smart Grid Demonstration Project in Panipat District of Haryana, India
- 4 145-kV GIS for Bousher Grid Station in Oman
- 5 DC High-Speed Vacuum Circuit Breakers for the Nippori Substation of East Japan Railway Company

Power Supply and Facility Systems	92
--	----

- 1 “UPS7000HX-T4” High-Efficiency Control
- 2 IEC Standard Compliant 24-kV Switchgear

Electric Distribution, Switching and Control Devices	92
---	----

- 1 “F-QuiQ Series” Manual Motor Starters

Power Electronics Systems Industry	93
---	----

Automation	94
-------------------	----

- 1 Expansion of “ALPHA7” Servo Systems
- 2 “PXF4-U” Socket Type Temperature Controller
- 3 Ultrasonic Flowmeter for Steam
- 4 “MONITOUCH TS1000 Smart Series” for Overseas Markets
- 5 “MICREX-SX SPF Plus” Motion Controller for Overseas Markets
- 6 “MICREX-VieW XX (Double X)” Function Expansion
- 7 “FLOADV8” Integrated Maintenance Support Tool for Drive Systems
- 8 Function Expansion of “HEART” High-Efficiency Engineering Tool
- 9 Interconnection of “MICREX-NX” with “PA Accelerator (PAA)” Integrated Engineering Efficiency Tool
- 10 Execution Control System Package for Distribution Centers
- 11 Computer Software Package for High-Speed Control Systems
- 12 Control System Package for Overseas Steel Rolling Mill Plants
- 13 “f(s) NISDAS7” Data Collection and Analysis Support Package Software
- 14 Monitoring and Control System for Wastewater Treatment Facilities in the Food Industry
- 15 Replacement of Remote Monitoring and Control System for Power Receiving and Transforming Facilities of Steelworks

Social solutions	99
-------------------------	----

- 1 Personal Dosimeter for Overseas Markets
- 2 “NSN4” Neutron Scintillation Survey Meter
- 3 VVVF Inverters Using SiC Modules for 5000 Series Railcars of Sanyo Electric Railway Co., Ltd.
- 4 Electrical Driven Door Systems for Tokyu Corporation and Toei Transportation
- 5 Main Circuit Electrical Equipment for Next-Release N700S Shinkansen Verification Test Trains of Central Japan Railway Company

Information solutions	101
------------------------------	-----

- 1 Karuwaza Web Scenario Creator

Electronic Devices	102
---------------------------	-----

Semiconductors	103
-----------------------	-----

- 1 “XS Series” Discrete IGBTs
- 2 Improved Photoresponsivity and Durability of Positive Charging Organic Photoconductors
- 3 2nd-Generation SiC Trench Gate MOSFETs
- 4 6.5th-Generation Boost Pressure Sensors
- 5 SiC-IGBT Development in the Strategic Innovation Promotion Program
- 6 Modules for DC/DC Converter of xEVs

Disk Media	105
-------------------	-----

- 1 Magnetic Recording Media for HDD Designed for Data Centers

Power Generation	106
-------------------------	-----

Thermal and Geothermal Power Generation	107
--	-----

- 1 Receiving Order from Rantau Dedap Geothermal Power Plant in Indonesia
- 2 Shipment of Steam Turbines and Generators to Biomass Power Plants

FUJI ELECTRIC REVIEW vol.65 no.2 2019 Detailed Contents

③ Replacement of Main Control System of Isogo Thermal Power Station Unit 1 of Electric Power Development Co., Ltd	
Nuclear Related Equipment	108
① Application of Advanced SIAL® Solidification Technology for Radioactive Waste	
New Energy	108
① Phosphoric Acid Fuel Cell for KT Corporation in Korea	
<hr/>	
Food Distribution	109
Vending Machines	110
① “FAG36JGCD80Y” Beverage Vending Machine for Southeast Asia	
Store Distribution	110
① “Swing Rack” Walk-In Case Support Racks	
② “ECS-777” Automatic Change Dispenser	
<hr/>	
Field Services	112
Field Services	112
① Remote Monitoring Service for Gas Analyzers	

Fundamental and Advanced Technologies	113
Fundamental Technology	114
① Verification and Design Technology for Dust Contamination of High-Voltage Equipment	
② Product Development Using Model-Based Development Methods	
③ Asset Protection Technology for Embedded Devices	
④ Model Predictive Control for Edge Devices Applicable to General-Purpose Controllers	
⑤ Lightning Surge Analysis Technology for Large-Scale Wind Power Generation Systems	
⑥ Wireless Firmware Update Technology	
⑦ Container-Based Virtualization for Microservices	
⑧ Automatic Visual Inspection Technology Using Image Recognition AI	
Advanced Technology	117
① 6.6-kV Transformerless Power Converters	
② High-Temperature Steam Generation Heat Pump Recovering Waste Heat	
③ Vertical GaN-MOSFETs Fabricated by Ion Implantation	
④ Reaction Analysis of SiC-MOSFET Interfaces Using Molecular Level Computation	
⑤ Structural Evaluation Technology for Stacking Faults on 4H-SiC Substrates
