

Notes to the Consolidated Financial Statements

Note 1. Basis of Preparing Consolidated Financial Statements

The accompanying consolidated financial statements of Fuji Electric Co., Ltd. (the "Company") and consolidated subsidiaries (together, the "Companies") are prepared on the basis of accounting principles generally accepted in Japan, which are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards, and are compiled from the consolidated financial statements prepared by the Company as required by the Financial Instruments and Exchange Law of Japan.

In preparing these statements, certain reclassifications and rearrangements have been made to the consolidated financial statements prepared domestically in Japan in order to present these statements in a form that is more familiar to readers outside Japan.

In addition, the notes to the consolidated financial statements include additional information which is not required under accounting principles generally accepted in Japan. Certain amounts in the prior year's financial statements have been reclassified to conform to the current year's presentation.

Note 2. Summary of Significant Accounting Policies

a. Principles of Consolidation

The consolidated financial statements for the year ended March 31, 2016 include the accounts of the Company and its 69 significant subsidiaries and its 5 subsidiaries and affiliates are accounted for by the equity method (48 and 5 in 2015).

Under the control or influence concept, the accompanying consolidated financial statements include the accounts of the Company and, with minor exceptions, those of its subsidiaries, whether directly or indirectly controlled, and those companies over which the Companies have the ability to exercise significant influence are accounted for by the equity method. All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in assets resulting from transactions within the Companies is eliminated. The Company does not consolidate nor apply the equity method to subsidiaries or affiliates whose gross assets, net sales, net income (loss) and retained earnings are not significant to the consolidated financial statements.

Investments in unconsolidated subsidiaries and affiliates are stated at cost.

The balance sheet date of certain consolidated subsidiaries is December 31. In principle, the financial statements of such subsidiaries were tentatively prepared in accordance with the fiscal year of the Company, and those were consolidated.

In the elimination of investments in subsidiaries, the assets and liabilities of the subsidiaries, including the portion attributable to non-controlling shareholders, are evaluated using the fair value at the time the Company acquired control of the respective subsidiaries.

Goodwill resulting from the difference between the cost and the underlying net assets at the respective dates of acquisition are being amortized over a period of 5 or 10 years.

b. Cash Equivalents

For the purpose of the consolidated statements of cash flows, the Companies consider all short-term, highly liquid instruments with a maturity of three months or less to be cash equivalents.

c. Inventories

Raw materials are mainly stated at cost, determined by the most recent purchase price method. Finished goods and work in process are mainly stated at actual cost determined by accumulated production cost for contract items or average cost for regular production items, except that finished goods of certain consolidated

subsidiaries are priced by the most recent purchase price method. In accordance with accounting practices generally accepted in the heavy electric industry, inventories include items with a manufacturing period exceeding one year.

Inventories with lower profitability were written down and the losses on valuation were included in cost of sales.

d. Securities

Marketable securities classified as other securities are stated at fair value. Unrealized gains and losses, net of taxes, are reported in a separate component of net assets.

Nonmarketable securities classified as other securities are stated at cost determined by the moving-average method.

e. Derivatives and Hedging Activities

The Companies enter into derivative financial instruments ("derivatives"), including foreign currency forward contracts to hedge foreign exchange risk associated with certain assets and liabilities denominated in foreign currencies and interest rate swap agreements as a means of managing its interest rate exposures on certain liabilities.

In addition, the Companies enter into commodity swap agreements to hedge the risk of fluctuation of commodity prices for raw materials.

Derivative financial instruments and foreign currency transactions are classified and accounted for as follows:

- a) Except as described in the following paragraphs b) and c), all derivatives are recognized as either assets or liabilities and measured at fair value, and forward contracts applied for forecasted transactions are measured at fair value but the unrealized gains/losses are deferred until the underlying transactions are completed if the forward contracts qualify for hedge accounting.
- b) Trade receivables and trade payables denominated in foreign currencies for which foreign exchange forward contracts are used to hedge the foreign currency fluctuations are translated at the contracted rate if the forward contracts qualify for hedge accounting.
- c) The interest rate swaps which qualify for hedge accounting and meet specific matching criteria are not remeasured at market value but the differentials paid or received under the swap agreements are recognized and included in interest expense or income.

f. Depreciation

1) Tangible fixed assets (excluding leased assets)

Depreciation is computed by the declining-balance method at rates based on the estimated useful lives of the assets, while the straight line method is applied to the buildings of the Company and its domestic consolidated subsidiaries acquired after April 1, 1998. The range of useful lives is from 7 to 50 years for buildings and from 5 to 12 years for machinery and equipment.

2) Leased assets

Depreciation is computed by the straight-line method over the lease period assuming no residual value. Finance leases other than those that were deemed to transfer the ownership of the leased assets to the lessees and contracted before April 1, 2008, are accounted for by the method that is applicable to ordinary operating leases.

g. Allowance for Doubtful Accounts

The allowance for doubtful accounts is stated in amounts considered to be appropriate based on the Companies' past credit loss experience and an evaluation of potential losses in the receivables outstanding.

h. Retirement Benefits

- (1) The retirement benefit obligation for employees is attributed to each period by the benefit formula method over the estimated years of service of the eligible employees.
- (2) The prior service costs are amortized by the straight-line method within the average remaining years of service of the employees participants. The actuarial gains and losses are amortized by the straight-line method within the average remaining years of service of the employee participants from the next period in which they arise, respectively.

i. Provision for Directors' Retirement Benefits

For certain consolidated subsidiaries, the accrued retirement benefits for directors were provided mainly at an amount to be required at the year-end according to internal regulations.

j. Research and Development Costs

Research and development costs are charged to income as incurred.

k. Recognition for Revenue and Costs

For long-term construction contracts whose outcome can be estimated reliably, the percentage-of-completion method is adopted. The stage of completion of a contract is determined by the percentage of the cost incurred to date to the estimated total cost. When the outcome of the construction contracts cannot be estimated reliably, the completed-contract method is adopted.

l. Income Taxes

The provision for income taxes is computed based on the pretax income included in the consolidated statements of income. The Company filed a consolidated tax return, which allows companies to file tax payments on the combined basis of profits or losses of the parent company and its wholly owned domestic subsidiaries. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of

temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

m. Foreign Currency Transactions

All monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rates at the balance sheet date. The foreign exchange gains and losses from translation are recognized in the consolidated statements of income to the extent that they are not hedged by forward exchange contracts.

n. Foreign Currency Financial Statements

Assets, liabilities, and revenue and expense accounts of the foreign consolidated subsidiaries are translated into Japanese yen at the current exchange rate as of the balance sheet date except for shareholders' equity, which is translated at the historical rate.

Differences arising from such translation are included in foreign currency translation adjustments and non-controlling interests in consolidated subsidiaries as a separate component of net assets.

o. Accounting for Consumption Taxes

The Japanese consumption taxes withheld and consumption taxes paid are not included in the accompanying consolidated statements of income.

p. Amounts Per Share

Basic net income per share is computed based on the profit attributable to common shareholders of the parent and the weighted average number of shares of common stock outstanding during the year, and diluted net income per share is computed based on the profit attributable to owners of parent's common stock and weighted average number of shares of common stock outstanding during each year after giving effect to the dilutive potential of shares of common stock to be issued upon the exercise of warrants and stock subscription rights.

Net assets per share are computed based on the net assets excluding share subscription rights and non-controlling interests and the number of shares of common stock outstanding at the year end.

q. Changes in Accounting Policies

(Application of "Accounting Standards for Business Combination, etc.") Effective April 1, 2015, the Company and its domestic consolidated subsidiaries have adopted "Revised Accounting Standard for Business Combination" (Accounting Standard Board of Japan ("ASBJ") Statement No. 21 of September 13, 2013), "Revised Accounting Standard for Consolidated Financial Statements" (ASBJ Statement No. 22 of September 13, 2013), and "Revised Accounting Standards for Business Divestitures" (ASBJ Statement No. 7 of September 13, 2013), etc.

Accordingly, the accounting treatment for business combination has been amended as follows: Any changes in a parent's ownership interests in its controlled subsidiaries are recorded as changes in capital surplus and the acquisition-related costs are expensed for the consolidated fiscal year in which they arise. Revisions in provisional amounts of purchase price allocations are recorded in the consolidated fiscal year in which the allocations are completed. In addition, the presentation method of net income and other related

items were amended and the reference to “minority interests” was changed to “non-controlling interests.”

Consolidated financial statements for the previous fiscal year have been reclassified in order to reflect this change in presentation.

In accordance with transitional treatment as stipulated in paragraph 58-2 (4) of the Revised Accounting Standard for Business Combination, paragraph 44-5 (4) of the Revised Accounting

Standard for Consolidated Financial Statements, and paragraph 57-4 (4) of the Revised Accounting Standard for Business Divestitures, the Company and its domestic consolidated subsidiaries started to apply these standards at the beginning of the current consolidated fiscal year and will continue to do so in the future.

These changes do not affect the consolidated financial statements for the current consolidated fiscal year.

Note 3. U.S. Dollar Amounts

The U.S. dollar amounts included in the accompanying consolidated financial statements and notes thereto represent the arithmetic results of translating yen into U.S. dollars at ¥112=U.S.\$1, the approximate

exchange rate as of March 31, 2016. The U.S. dollar amounts are presented solely for the convenience of the readers outside Japan.

Note 4. Inventories

Inventories as of March 31, 2016 and 2015 consisted of the following:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Merchandise and finished goods	¥ 56,290	¥ 54,495	\$ 502,596
Work in process	52,410	48,787	467,955
Raw materials	36,439	34,332	325,333
Inventories	¥145,139	¥137,614	\$1,295,884

Losses (gains) on valuation of inventories with lower profitability were ¥587 million (\$5,246 thousand) and ¥663 million for the years ended March 31, 2016 and 2015, respectively. These were included in cost of sales.

Note 5. Pledged Assets and Financial Assets Accepted as Collateral

The amounts of assets pledged as collateral for trade payables, short-term debt and long-term debt as of March 31, 2016 and 2015 were as follows:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Investment securities	¥ 15	¥ 23	\$ 138
Property, plant and equipment	5,723	3,984	51,107
Intangible assets	472	—	4,205
Total	¥6,210	¥4,007	\$55,450

Collateralized liabilities as of March 31, 2016 and 2015 were as follows:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Trade payables	¥ 43	¥ 45	\$ 385
Short-term debt	244	—	2,182
Long-term debt	431	501	3,844
Total	¥718	¥546	\$6,411

Note 6. Financial Instruments

1. Status of financial instruments

(1) Policy regarding financial instruments

The Companies limit the scope of their cash and fund management activities to short-term deposits. When raising funds, the Companies have a policy of relying principally on bank borrowings, bonds payable and commercial paper. The Companies mainly raise the operating funds through short-term loans payable and commercial paper, and the funds relating to capital investments through long-term loans payable and bonds payable. The Companies make use of derivatives to reduce risk, as explained below, and have a policy of not engaging in derivative transactions for speculative purposes.

(2) Details of financial instruments and associated risk

In the course of its business activities, trade receivables are exposed to customer credit risk.

In addition, trade receivables denominated in foreign currencies arising from international business are exposed to exchange risk. The Companies hedge the exchange risk, by using foreign exchange forward contracts within the range prescribed relating to the net amount of the trade receivables denominated in foreign currencies, offset by the amount of the trade payables denominated in the same currencies.

Short-term investments and investment securities are comprised primarily of stocks of companies with which the Companies have business relations and are exposed to market price risk.

Trade payables are mostly payable within one year. Some trade payables are denominated in foreign currencies and exposed to exchange risk. The Companies hedge the exchange risk of the trade payables denominated in foreign currencies in principle, except for the amount within that of trade receivables denominated in the same currencies, by using foreign exchange forward contracts.

Short-term loans payable and commercial paper are primarily raised for the purpose of maintaining operating funds. Bonds payable, long-term loans payable and lease obligations on finance lease transactions are primarily raised for the purpose of preparing capital investment. The maturities of these bonds payable, long-term loans payable and lease obligations on finance lease transactions are up to 11 years at the longest after the balance sheet date. Some are exposed to interest rate fluctuation risk and the Companies hedge such risk by interest rate swap transactions.

Regarding derivatives, the Companies employ foreign exchange forward contracts to reduce the risk of foreign currency exchange movements that arise from the previously mentioned receivables and payables denominated in foreign currencies. In addition, the Companies use interest rate swap transactions to reduce the interest rate fluctuation risk of loans, and use commodity swap transactions to reduce the risk of fluctuation of commodity prices for raw materials. As hedging instruments under hedge accounting, the Companies enter into these derivative transactions in accordance with the Companies' policies to reduce the corresponding risk to each hedged item. The Companies compare the market change of hedged items and hedging instruments or the cash flow changes. Assessment of effectiveness for hedging activities depends on the ratio of the amount of change.

(3) Systems for management of financial instruments risk

a) Credit risk management (the risk that transaction partners may default on their obligations to the Companies)

The credit risk in relation to trade receivables from customers, pursuant to criteria for managing credit exposure, is managed by controlling due dates and balances of each customer. In addition, the Companies manage to identify doubtful receivables earlier and mitigate their risk caused by aggravation of the financing position, etc.

Because the counterparties to derivative transactions are limited to authentic financial institutions, the Companies do not anticipate any losses arising from credit risk.

b) Market risk management (the risks arising from fluctuations in exchange rates, interest rates and other indicators)

The Companies, in principle, employ foreign exchange forward contracts to reduce the risk of foreign currency exchange movements that arise from the previously mentioned receivables and payables denominated in foreign currencies. In addition, the Companies use interest rate swap transactions to reduce the interest rate fluctuation risk of loans, and use commodity swap transactions to reduce the risk of fluctuation of commodity prices for raw materials.

Regarding investment securities, the Companies periodically review the market value of such financial instruments and the financial position of the issuer (the company having business transactions with the Companies). In addition, other than debt securities to be held until maturity, the Companies review the status of these investments on a continuing basis.

Derivative transactions have been entered into in accordance with the Companies' policies. The execution of derivatives, which is based on the application of each section, is mainly controlled by the Finance Department of each company, or by the Material Section regarding commodity swap transactions. In addition, the Finance Department periodically reports to the management and each section, and strictly performs risk management relating to derivative transactions.

c) Liquidity risk management (the risk that the Companies may not be able to meet their payment obligations on the scheduled date)

The Companies reduce the liquidity risk by having each company review and revise cash management plans monthly or timely.

(4) Supplementary explanation of the estimated fair value of financial instruments and related matters

The estimated fair value of financial instruments is their price based on their market price and other indicators. When there is no market price available, it includes prices which are reasonably computed.

Since variable factors are taken into account in computing the price, this price may fluctuate depending on different assumptions adopted. In addition, the contract (notional) amount of derivatives in "Note 8. Derivatives" is not an indicator of the actual market risk involved in derivative transactions.

2. Estimated fair value and other matters related to financial instruments

Carrying amounts on the consolidated balance sheets as of March 31, 2016 and 2015, estimated fair value and the variance between them are shown in the following table. Financial instruments whose estimated fair value is deemed to be extremely difficult to obtain are not included (please refer to Note 2).

(*1) Figures shown in parentheses are liability items.

(*2) The value of assets and liabilities arising from derivatives is shown at net value, and a net liability position is shown in parentheses.

Notes: 1. Methods for computing the estimated fair value of financial instruments, and information on securities and derivatives

- (1) Cash and cash equivalents
Since these items are settled in a short period of time, estimated fair values are virtually the same as the carrying amounts.
- (2) Trade receivables
Fair values of trade receivables, classified by each maturity, are based on the present value discounted by the interest rate determined taking into account the term until maturity and the credit risk.
- (3) Investment securities
Stocks are valued at the exchange trading price. For information on securities classified by the purpose of holding, please refer to "Note 7. Securities."
- (4) Trade payables, (5) Short-term debt, (6) Current portion of long-term debt (except bonds) and (7) Lease obligations (Current Liabilities)
Since these items are settled in a short period of time, estimated fair values are virtually the same as the carrying amounts.
- (6) Current portion of long-term debt (bonds) and (8) Long-term debt (bonds)
Fair values of bonds issued by the Company are based on each market price.
- (8) Long-term debt (except bonds) and (9) Lease obligations (Long-term Liabilities)
Fair values of these items are based on the present value of the total of principal and interest discounted by the interest rate applied if similar new borrowings and new lease transactions were entered into.
- (10) Derivatives
Please refer to "Note 8. Derivatives."

2. Items for which obtaining an estimated fair value is deemed to be extremely difficult

Because the items in the preceding table do not have market price and obtaining the estimated fair values of these items is deemed to be extremely difficult, fair value has not been disclosed in (3) Investment securities.

	Total		\$314,263	\$221,772	\$(14,540)

Notes: 1. The fair value is estimated based on forward exchange rates.

2. Since amounts in foreign currency forward contracts treated by the allocation method are handled together with accounts receivable-trade and accounts payable-trade that are subject to hedging, the estimated fair value of such contracts is included in the fair value of accounts receivable-trade or accounts payable-trade.

Notes: 1. The fair value is principally based on the quotes obtained from the correspondent financial institutions.

2. Since amounts in interest rate swaps which qualify for hedge accounting and meet specific matching criteria are handled together with long-term loans payable that are subject to hedging, the estimated fair value of such interest rate swaps is included in the fair value of the long-term loans payable.

Note 11. Retirement Benefits

1. Outline of retirement benefits for employees

The Company and most of its consolidated subsidiaries have either funded or unfunded defined benefit plans and defined contribution pension plans.

Defined benefit corporate pension plans are all funded and cover substantially all employees who are entitled to lump-sum or annuity payments determined by reference to their basic rates of pay and length of service. In addition, retirement benefit trust has been established in certain pension plans.

Lump-sum payment plans are either unfunded or funded as a result of establishing retirement benefit trust. They cover substantially

all employees who are entitled to lump-sum payments determined by reference to either points obtained with interest credits or their basic rates of pay and length of service.

Certain domestic consolidated subsidiaries adopted a simplified method in the calculation of net defined benefit liability and retirement benefit expense. Certain domestic consolidated subsidiaries have multiemployer pension plans accounted for by the same methods used for defined contribution pension plans because they cannot reasonably calculate their portion of pension assets corresponding to their contributions.

2. Information on defined benefit pension plans

Note 12. Shareholders' Equity

1. Shares issued and outstanding / Treasury stock

The Companies Act of Japan provides that an amount equal to 10% of the amount to be disbursed as distributions of capital surplus (other than the capital reserve) and retained earnings (other than the legal reserve) be transferred to the capital reserve and the legal reserve, respectively, until the sum of the capital reserve and the legal reserve equals 25% of the capital stock account. Such distributions can be made at any time by resolution of the shareholders or by the Board of Directors if certain conditions are met.

Movements in shares outstanding and treasury stock during the years ended March 31, 2016 and 2015 were as follows:

4. Revision of the amount of deferred tax assets / liabilities by change in Corporate Tax Rate

The "Act for Partial Amendment of the Income Tax Act, etc." (Act No. 15 of 2016) and the "Act for Partial Amendment of the Local Tax Act, etc." (Act No. 13 of 2016) were promulgated on March 29, 2016. The corporate tax rates are to be lowered from the fiscal year beginning April 1, 2016. Accordingly, the effective statutory tax rate for the calculation of deferred tax assets and liabilities will be lowered from 32.3% to 30.9% for temporary differences expected to be utilized in the fiscal years beginning April 1, 2016 and 2017, and to 30.6% for fiscal years beginning April 1, 2018 and onwards.

As a result of these changes, deferred tax assets (after deducting deferred tax liabilities) as of March 31, 2016 decreased by ¥1,241 million (\$11,087 thousand).

Deferred income taxes and valuation difference on available-for-sale securities increased by ¥1,419 million (\$12,675 thousand) and ¥706 million (\$6,304 thousand), respectively. Remeasurements of defined benefit plans included in accumulated other comprehensive income decreased by ¥505 million (\$4,511 thousand).

Note 18. Contingent Liabilities

Contingent liabilities as of March 31, 2016 and 2015 were as follows:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Guarantees	¥8,781	¥13,718	\$78,406

Note 19. Leases

1. Finance lease transactions

(1) Leased assets

Leased assets primarily consist of machinery and equipment and software.

(2) Depreciation method for leased assets

Finance leases other than those that were deemed to transfer the ownership of the leased assets to the lessees and contracted before April 1, 2008, are accounted for by the method that is applicable to ordinary operating leases.

Pro forma information of those leased property such as acquisition cost, accumulated depreciation, accumulated impairment loss, obligations under finance leases, lease expense, depreciation expense, interest expense and impairment loss on an "as if capitalized" basis for the years ended March 31, 2016 and 2015 were as follows:

(a) Acquisition cost and accumulated depreciation under finance leases:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Acquisition cost	¥1,904	¥2,324	\$17,005
Accumulated depreciation	1,463	1,693	13,063
Net leased property	¥ 441	¥ 631	\$ 3,942

(b) Obligations under finance leases:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Due within one year	¥166	¥214	\$1,491
Due after one year	363	529	3,233
Total	¥529	¥743	\$4,724

(c) Lease expense, depreciation expense and interest expense under finance leases:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Lease expense	¥228	¥599	\$2,040
Depreciation expense	184	408	1,646
Interest expense	20	31	183

(d) Method of calculating estimated depreciation expense

Depreciation is computed by the straight-line method over the lease period assuming no residual value.

(e) Method of calculating estimated interest expense

Interest expense is computed and allocated to each period using the interest method assuming interest expense to be the excess of total lease payments over the acquisition cost.

2. Operating lease transactions

The minimum rental commitments under noncancellable operating leases as of March 31, 2016 and 2015 were as follows:

	Millions of yen		Thousands of U.S. dollars (Note 3)
	2016	2015	2016
Due within one year	¥1,791	¥1,490	\$15,992
Due after one year	2,055	3,135	18,352
Total	¥3,846	¥4,625	\$34,344

Note 20. Segment Information

1. Segment information

(1) Outline of reporting segments

The Companies' reporting segments are components for which separate financial information is available and whose operating results are reviewed regularly by the Board of Directors of the Company in order to make decisions about resource allocation and to assess performance. The Company has business headquarters by products and services at its head office. The business headquarters prepare comprehensively global strategies related to their products and services and control their business activities.

Accordingly, the Companies have five reporting segments, principally based on the business headquarters, that take into account the similarity of category and nature of products and services: Power and Social Infrastructure, Industrial Infrastructure, Power Electronics, Electronic Devices and Food and Beverage Distribution. These segments consist of 2 or more business segments.

As of April 1, 2015, reflecting change of organization structure, the reporting segments were reclassified in Power and Social Infrastructure, Industrial Infrastructure, and Power Electronics. The reporting segment information for the year ended March 31, 2015 has been reclassified to reflect this change.

Main products and services of each reporting segment consisted of the following:

Reporting segments	Main products and services
Power and Social Infrastructure	Thermal/geothermal/hydraulic power generation, solar power generation systems, fuel cells, energy management systems, smart meter, information systems
Industrial Infrastructure	Substation equipment, industrial power supply facility, industrial drive systems, plant control systems, industrial energy management systems, data centers, measuring instruments and sensors, radiation monitoring systems, electrical equipment and air conditioning construction
Power Electronics	Inverters/servos, motors, railcar systems, uninterruptible power systems (UPSs), power conditioning sub-systems (PCSs), switchboards, power distribution and control equipment
Electronic Devices	Power semiconductors, photoconductors, magnetic disks
Food and Beverage Distribution	Beverage vending machines, vending machines for food and other goods, store equipment, currency handling equipment

(2) Calculation method of net sales, profit or loss, assets, liabilities and other items on each reporting segment

The accounting policies applied by each reporting segment are consistent with those described in "Note 2. Summary of Significant Accounting Policies." Segment profit or loss presented in segment information is calculated based on operating income in the consolidated statements of income. Intersegment sales and transfer are determined by market value.

(3) Information on net sales, profit or loss, assets, liabilities and other items by each reporting segment

Reporting segment information as of March 31, 2016 and 2015 and for the years then ended were as follows:

For the year ended March 31, 2016, business combinations have not been disclosed because they do not have significant impact on the consolidated financial statements.

Note 23. Asset Retirement Obligations

Asset retirement obligations recorded on the consolidated balance sheets

1. Outline of asset retirement obligations

The Companies record asset retirement obligations related to the expenses for removing asbestos from company-owned buildings upon their dismantlement and the obligations to restore head offices, sales offices and other premises to their original condition upon termination of their lease contracts.

Regarding some of the obligations to restore head offices, sales offices and other premises to their original condition, the Companies estimate nonrecoverable amounts of deposits for those premises and record the portion attributable to the current year as expenses, instead of recording asset retirement obligations.

2. Calculation method of asset retirement obligations

In calculating the amounts of asset retirement obligations, the Companies estimate a period of use between 4 and 49 years and use a discount rate equivalent to the interest rate of government bonds corresponding to the use period (0.2% to 2.3%).

3. Changes in the total amounts of asset retirement obligations

Changes in the total amounts of asset retirement obligations for the years ended March 31, 2016 and 2015 were as follows:
