Fuji Electric has established a remuneration system and remuneration levels for Directors and Audit & Supervisory Board Members that are deemed appropriate for their respective duties and in accordance with shareholder mandates, giving due consideration to the aims of securing and maintaining competent personnel and providing incentives for the improvement of business performance.

The validity and necessity of revisions to the aforementioned compensation systems and amounts are verified regularly based on changes in the operating environment and on objective external data.

(1) Standing Directors

As Standing Directors are charged with the responsibility of improving consolidated operating performance for each fiscal year and realizing improvements in corporate value over the medium- to long-term, their remuneration is structured and managed as follows.

1) Base Remuneration

Base remuneration is a predetermined amount that is paid on a specific day of every month to executives according to their position. A portion of the base remuneration is contributed to the Director shareholding association to share the economic interests of shareholders and as an incentive to make management aware of share value.

2) Performance-Linked Remuneration

Performance-linked remuneration is paid on a specific day of every year only in instances in which dividends are paid to all shareholders from retained earnings. The total amount of executive performance remuneration shall be within 1.0% of consolidated net income for the fiscal year prior to the date of payment in order to make the link with consolidated results for each fiscal year more clearly.

The amount of performance-linked remuneration will be determined in consideration of the consolidated financial results (net sales, operating income, net income, dividends, etc.) of the previous fiscal year, based on the payment standard that the ratio of performance-linked remuneration shall increase in line with the increase in the ratio of consolidated operating income to net sales, which is set as an important target in the Medium-Term Management Plan. Since the ratio of consolidated operating income to net sales is 8.2% in fiscal 2021, the ratio of performance-linked remuneration to total compensation will be approximately 53%.

Basic Policy on Control of the Company

1. Details of the Basic Policy

In implementing the corporate mission and continuing to improve corporate value, Fuji Electric amasses unique technologies, experience, and know-how and strives to develop and maintain good relations with various stakeholders, including customers, partners, communities, and employees.

These are the Fuji Electric's precious tangible and intangible assets, the Fuji Electric's DNA, and the resources that support the creation of corporate value for Fuji Electric.

Based on the corporate philosophy, the Company strives to manage in line with changes in the environment. The Company recognizes that the most effective countermeasures against share purchases that could damage the corporate value of Fuji Electric are increasing corporate value from a medium- to long-term perspective and further raising the share of profits to shareholders and thus strives to realize those aims.

Furthermore, the Company is actively engaging in a range of investor relations activities to ensure that the Fuji Electric's stock price is properly understood. The Company will strive to further deepen understanding of Fuji Electric by issuing reports on its performance, including quarterly financial reports, and holding factory tour programs for the shareholders.

The Board of Directors recognizes that the free trade of shares by shareholders is a reality as a listed company and believes that the question of whether or not large-scale purchases of shares in the Company by specific individuals should be permitted is a matter that should ultimately be delegated to the shareholders.

However, corporate acquisitions undertaken to profit unduly from selling a company's stock at the highest price do occur. The Board of Directors does not believe that any party who engages in any such large-scale share purchases of the Company's shares or tables proposals that do not contribute to the corporate value of Fuji Electric or the mutual benefit of the shareholders are suitable parties to control the Company's finances and the determination of its business policy.

At this point in time, no specific threat related to large-scale purchases of the Company's shares has emerged. Moreover, the Company has no plans to put in place any specific preventative measures (takeover defense measures) against the emergence of a takeover threat.

However, the Board of Directors will, as a managerial duty to the shareholders, establish an internal system to install measures to defend against any large-scale purchases of the Company's shares that threaten the corporate value of Fuji Electric or the mutual benefit of the shareholders.

2. Fuji Electric's measures to implement the basic policy

(1) Initiatives to Improve Corporate Value of Fuji Electric

As its basic strategy for sustainable growth, Fuji Electric aims to achieve growth on the global market based on the power electronics technologies it has cultivated over many years, which freely manipulate electricity, backed by energy and environment investments projected to take place in many countries. To achieve this, we will rapidly shift our managerial resources to the field of energy and the environment to contribute to maximization of our corporate value and resolution of social and environmental issues as a company that contributes to the global society through business.

To realize this, we will rapidly shift our managerial resources to the field of energy and the environment, aiming to maximize our corporate value and practice CSR management as a company that contributes to the global society through business.

(2) Measures to Prevent Control of the Company by Undesirable Parties as Described in the Basic Policy
The Company will, based on 1. Details of the Basic Policy above, strive to establish an internal system in view of any potential or actual purchases of the Company's shares that threaten the corporate value of Fuji Electric or the mutual benefit of the shareholders.

Specifically, the Company will very carefully monitor daily trading movements and shareholder changes and at the same time has put in place a first-response manual for contingencies and established a framework for collaboration with external experts. Going forward, the Company will strive to determine and enact specific preventative measures in a timely and appropriate manner in order to enhance its internal systems.

Furthermore, the Company will continue to consider the introduction of takeover response measures, from the viewpoints of ensuring and increasing the corporate value of Fuji Electric and the mutual benefit of the shareholders, based on the opinions and judgments of the legal system and the relevant authorities, social trends, and the opinions of our stakeholders.

3. Decisions and Rationale of the Board of Directors Regarding the Measures Above

Because the measures referred to in 2. above are means (1) to maintain and enhance the corporate value of the Company over the medium term and (2) to establish internal systems to respond to large-scale purchases of the Company's shares that threaten the corporate value of Fuji Electric or mutual benefits of shareholders, the Board of Directors confirmed and resolved at a meeting of the Board of Directors that these measures comply with the basic policy in 1. above and that neither measure represents a threat to the mutual benefits of the shareholders nor is a means to keep the members of the current senior management team in their positions.

Further, the resolution was unanimously agreed upon at an Audit & Supervisory Board meeting, provided that the specific operations of the measures described in 2. above are conducted properly.

2. Other Matters regarding Corporate Governance Frameworks

Fuji Electric's internal frameworks for timely disclosure of corporate information are as follows.

1. Basic Policy Regarding Timely Disclosure of Corporate Information

Fuji Electric recognizes that the impartial and appropriate disclosure of highly transparent information is a top management priority in accordance with laws and the regulations of the financial instruments exchanges on which the Company is listed. Members of management are thus personally involved in information disclosure.

The Fuji Electric Code of Conduct, which defines the basic principles that officers and employees are expected to remain mindful of in their activities, sets the behavioral standard that earnest and proactive information disclosure and communication with shareholders and other investors should be practiced in order to foster mutual understanding and trust.

Internal frameworks are established in accordance with the aforementioned basic policy.

2. Internal Frameworks for Timely Disclosure of Corporate Information

Frameworks based on the following items have been established at the Company and at all subsidiaries and subsidiaries of subsidiaries in order to ensure the appropriate and timely disclosure of corporate information.

(1) Decisions and Occurrences

Internal regulations defining the duties and authority of the Chairman and CEO, the President and COO, executive officers, and employees prescribe that approval from the Chairman and CEO of the

Company is to be received with regard to timely disclosure and other major external announcements by the Company and by subsidiaries and subsidiaries of subsidiaries as stipulated in the Financial Instruments and Exchange Act.

Corporate planning divisions are responsible for disclosure, and information requiring disclosure is to be collected within these divisions. Under the guidance of heads of these divisions, to whom responsibility for handling information is assigned, the divisions will coordinate with public relations, investor relations, finance, legal affairs, and other relevant divisions to determine the necessity of timely disclosure based on the Financial Instruments and Exchange Act and the timely disclosure rules of financial instruments exchanges. Disclosure materials are then to be prepared after confirming their accuracy and legality.

Corporate planning divisions are to conduct timely disclosure regarding decisions after receiving approval from the Board of Directors and regarding occurrences after receiving approval from the Chairman and CEO.

In addition to the aforementioned lines of reporting, whistle-blowing systems have been established to facilitate the comprehensive collection of information by enabling employees of the Company and of subsidiaries and subsidiaries of subsidiaries to report directly to the president of the Company with regard to acts that may constitute legal violations.

(2) Revisions to Financial Information, Performance Forecasts, and Dividend Forecasts

Information requiring timely disclosure regarding revisions to the financial information, performance forecasts, and dividend forecasts of the Company and of subsidiaries and subsidiaries of subsidiaries is collected within the financial divisions of the Company.

In regard to financial information, internal regulations obligate the representations of subsidiaries and of subsidiaries of subsidiaries to submit confirmation reports verifying the accuracy of financial information. As for the internal control audit systems for financial reports described in the Financial Instruments and Exchange Act, internal controls are in place and steps are taken to ensure the accuracy of reports including obligating the appropriate implementation of controls regarding assessments and reports.

Under the guidance of heads of corporate planning divisions, to whom responsibility for handling information is assigned, financial divisions pursue coordination of public relations, investor relations, corporate planning, and legal divisions to determine the necessity of timely disclosure of the information collected in accordance with the above provisions based on the Financial Instruments and Exchange Act and the timely disclosure rules of financial instruments exchanges. Disclosure materials are then to be prepared after confirming their accuracy and legality.

[Corporate Governance Systems]

Fuji Electric’s corporate governance framework consists of the Board of Directors, which performs the functions of management supervision and important decision-making, and the Audit & Supervisory Board, which performs the functions of management audit. As a company with company auditors, the Audit & Supervisory Board appropriately audits the Company’s Directors and executive officers from an objective and neutral viewpoint.

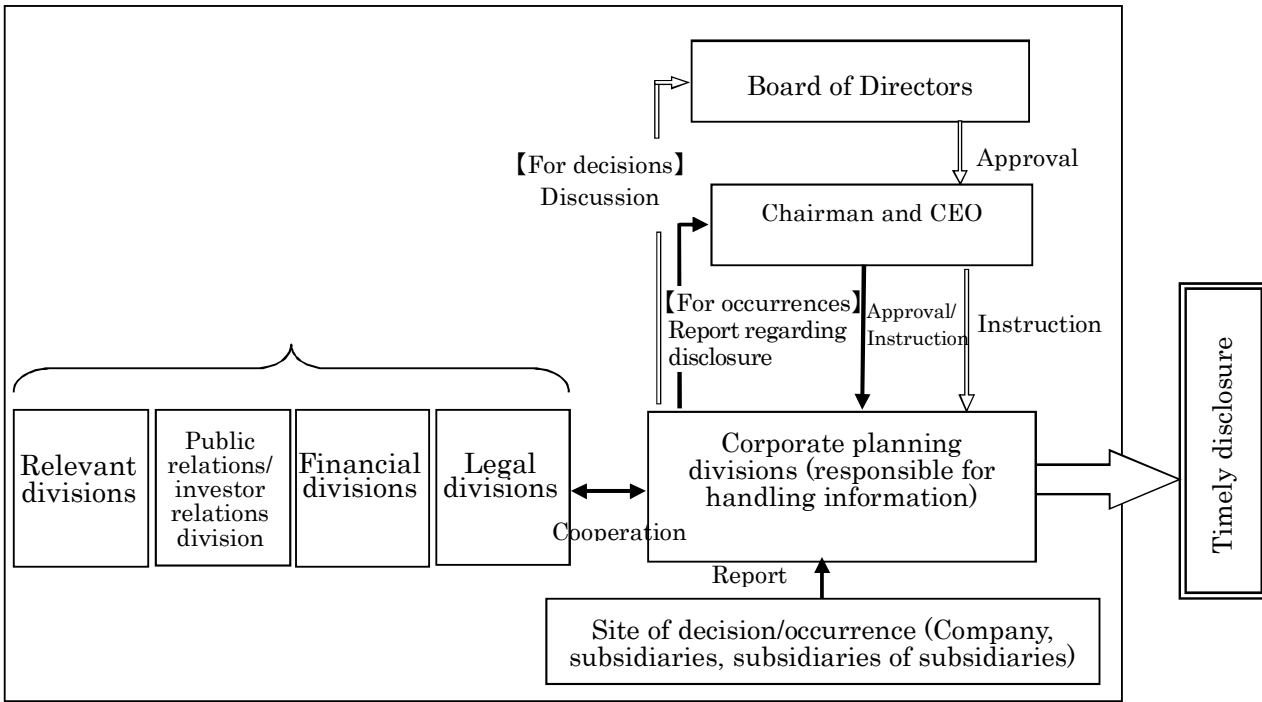

The Company actively brings in outside officers who meet the requirements for independent officers to strengthen our management supervision and audit functions, and has established the Nomination and Remuneration Committee, the majority of whose members are outside officers, as an advisory organ for the Board of Directors.

To clarify the roles of management and execution, the Company has introduced an executive officer system in an effort to clarify the responsibilities of each business and improve the efficiency of business execution. The Company is endeavoring to build an effective corporate governance framework, by putting in place the Executive Committee, which deliberates and reports important management issues as an advisory organ for the Chairman and CEO and the President and COO, as well as other committees tasked with planning and promoting key business strategy issues and key external issues, such as regulatory compliance.
