Fuji Electric Co., Ltd

Fuji Electric Exhaust Gas Cleaning System (EGCS)

Onboard Training

We would like to express our deepest appreciation to you for your continued support for our ship exhaust gas cleaning systems (EGCS).

Instruction of EGCS are given to crew members on board before delivery from yard but training will be implemented again on the ship in the future in order to respond to the request for re-education to the crew members after the change of crew and after the start of service.

The basic period of training is one day, but adjusts can be made for half a day, two days, etc. upon request.

Currently, we will limit our efforts to the timing when the ship makes a port call to Japan, but in the future we will steadily expand our efforts overseas.
