

- Fuji IGBT Module V Series 1200V Family -

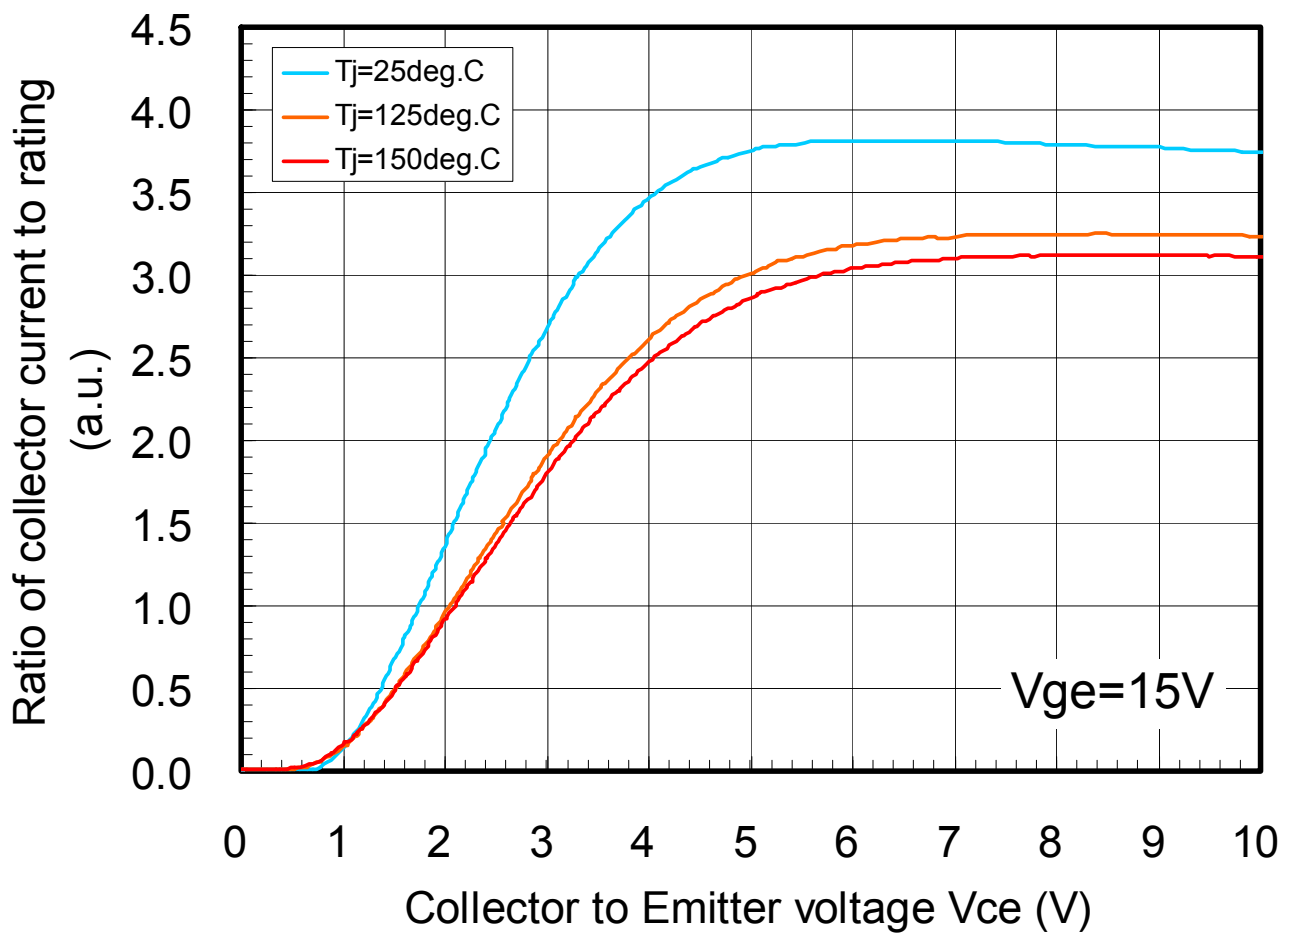

High current output characteristics

V series 1200V product family

Conditions: $T_j = 25^\circ\text{C}$, 125°C and 150°C

$V_{ge} = 15\text{ V}$

Note: This data shows the typical waveforms of chip characteristics. The effect of the internal resistance of the module is not included

Technical data: MT5F24326
