

- Fuji IGBT Module V Series 1700V Family -

High current output characteristics

V series 1700V product family

Conditions: $T_j=25^{\circ}\text{C}$, 125°C and 150°C

$V_{ge}=15\text{V}$

same as 1200V

Note 1: This data shows the typical waveform of 2MBI650VXA-170E-50 and the values of chips that do not include the internal resistance of the module.
